Dear Susan Paruch

We are writing to let you know the experience this area had with the Lowell wind turbines on Nov. 3<sup>rd</sup> and 4<sup>th</sup>.

Upon awakening at 6:00 AM on Nov. 3<sup>rd</sup> with the wind coming from the northwest and very little wind off the mountain there was horrendous noise coming east from the project.

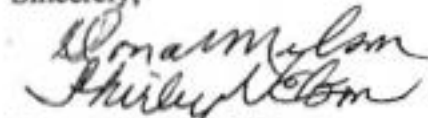

It projected out to a distance of over 3 ½ miles and was constant from the early hours of the morning until after 5:00 PM on the 4<sup>th</sup> of November.

One couple was awakened at 4:00 AM on the morning of the 3<sup>rd</sup>.

We decided to check with our neighbors and friends on the east side of the mountains to see what they had witnessed.

The results are on the 4 pages enclosed. We only went to these few places but many more people are complaining.

Sincerely,

Don and Shirley Nelson

This letter is to inform you that we the undersigned are hearing noise from the Lowell wind farm that extends out over 3 1/2 miles and it is unbearable. Yesterday (11-3-12) there were only about ten turbines operating but the noise was a constant roar like a speeding truck passing next to us that never went away.

The winds were Northwesterly and there was heavy cloud cover.

We hear the turbines both inside and outside ~~when~~ when the North or North west wind is blowing not so much from the east and South but they are still quite audible.

Jonathan Powell 2 miles I hear the turbines inside my house. I also hear them at my camp at Hitchcock hill on Albany Center  
Chair ~~to the~~ select man chair  
Carl Chaffee Albany Village  
2 miles

Frank Coulton - select man Albany 3 miles  
I hear them very loudly - (full on)

MIKE NELSON - Intervener, Town of Albany. I live three and a half miles away from the towers. Yesterday in my yard it sounded like a cross between a helicopter and high winds blowing through the trees.
